## *Environmental Research, Engineering and Management Expresses Gratitude to all its Contributors*

**Prof. dr. Jolita Kruopienė**

Institute of Environmental Engineering

Kaunas University of Technology

jolita.kruopiene@ktu.lt

This issue is special because it is the 100<sup>th</sup> issue of Environmental Research, Engineering and Management (EREM).

That is a good occasion to express gratitude to everyone who contributes to publishing of the journal, which is a platform for academics and practitioners to share and discuss insights related to sustainable development.

Thanks to publishers of the journal – Kaunas University of Technology, Vytautas Magnus University, and Lithuanian Energy Institute. The journal has grown and strengthened its position in recent years. EREM is included in the SCOPUS database since 2016, with a growing Cite Score.

Special thanks goes to the members of the editorial board and to numerous reviewers outside the editorial board. Your time spent and your expertise are indispensable prerequisites for a quality of the journal.

Special thanks goes to all the technical staff. Your

attentiveness and diligence are essential for the journal to be born.

Thanks to all the authors who decide to publish their research in EREM. Up to 150 articles have been submitted to the journal in recent years. Geography of the published papers spans over all the continents. According to the corresponding author of the papers published within the last 5 years, 60% are from Europe, 22% from Africa, 15% from Asia, with the least share, 3%, from American continent.

Thanks also to those who read the journal. We hope that EREM contributes to the healthier environment by spreading the latest knowledge on environmental research, and on engineering and managerial solutions. You may find our focus and scope on the website (<http://erem.ktu.lt/index.php/erem/about>).
