Journal of *Environmental Research, Engineering and Management* receives approximately 50 manuscripts annually which have to be carefully reviewed before being published in the journal. EREM is proud of its rigorous peer review process which enables the authors to have quality reviews within the relatively short period of time. The reviewers do play the most significant role in determining the quality of the journal. Here we give special thanks to all of those listed below who volunteered their time and expertise for the issues of EREM during 2015. Many thanks to you!
